CUSTOMIZING TRANSACTIONS..... 1

    Notes..... 2

    Contents..... 3

    Introduction..... 4

    1. Installation..... 5

    2. QuantityWare Customizing Transactions ..... 6

## Introduction

---

The additional functionality provided by QuantityWare also contains customizing possibilities, for example range check data.

Within this document, we provide an overview how to easily access the customizing transactions.

The solution runs only in a SAP ABAP environment in which IS-Oil has been implemented.

This solution can be accessed by the SAP Quantity Conversion Interface (QCI) or the QuantityWare MQCI (Model based QCI) and is controlled by the customising provided.

## 1. Installation

---

The technical implementation is provided as a part of a CSP package for BCG 10A.

Please follow the standard SAP instructions for importing service packages into your system via transaction SPAM, or the implementation on installation packages via transaction SAINT.

SAP Oil and Gas must be installed

QuantityWare BCG 10A must be installed.

Customizing settings, which are needed in every client in which this standard will be used, are included in the delivery package.

On releases based upon SAP 4.72 and below, the related customizing transport must be imported into all necessary clients, or distributed to them from client 000.

On releases based upon SAP ERP 2005 (ECC 6.00) or newer, BC Set /QTYW/BCG\_10A must be activated in the relevant clients.

Please refer to the QuantityWare BCG 10A Installation Guide for more information.

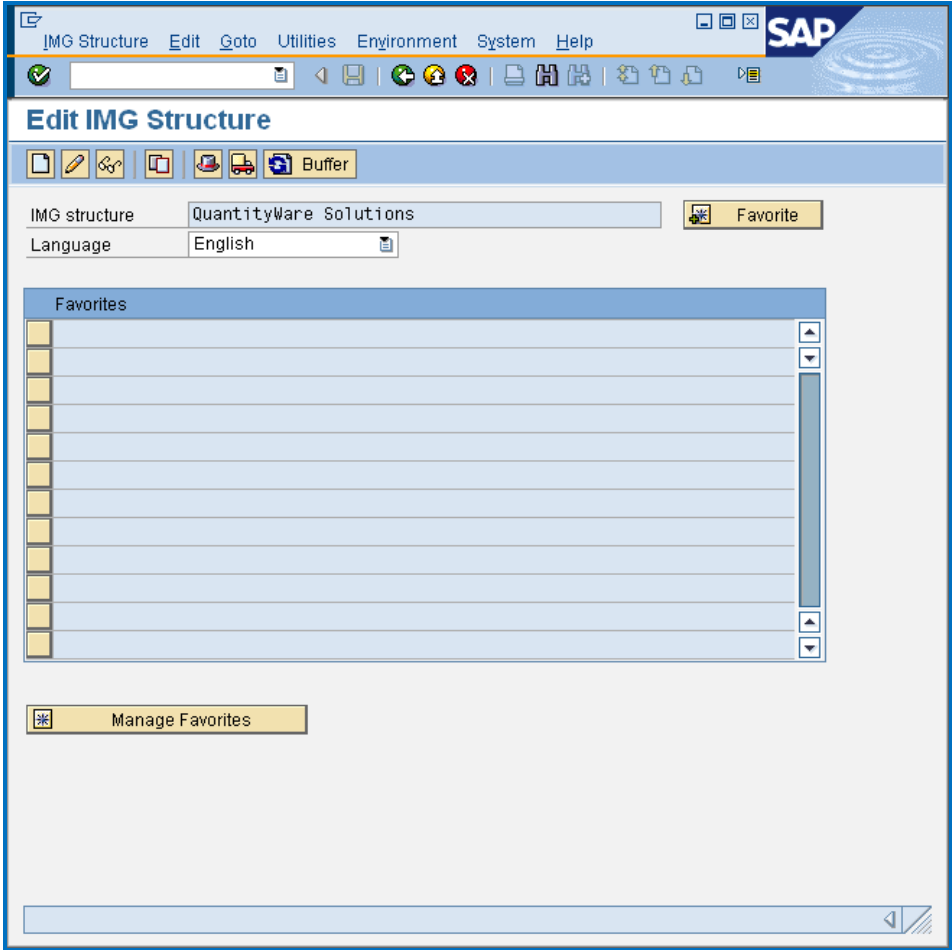

**▲ WARNING:** *If you import the customizing template into a pre-existing client, any pre-existing entries listed within the template (transport or BC-Set) will be OVERWRITTEN!*

## 2. QuantityWare Customizing Transactions

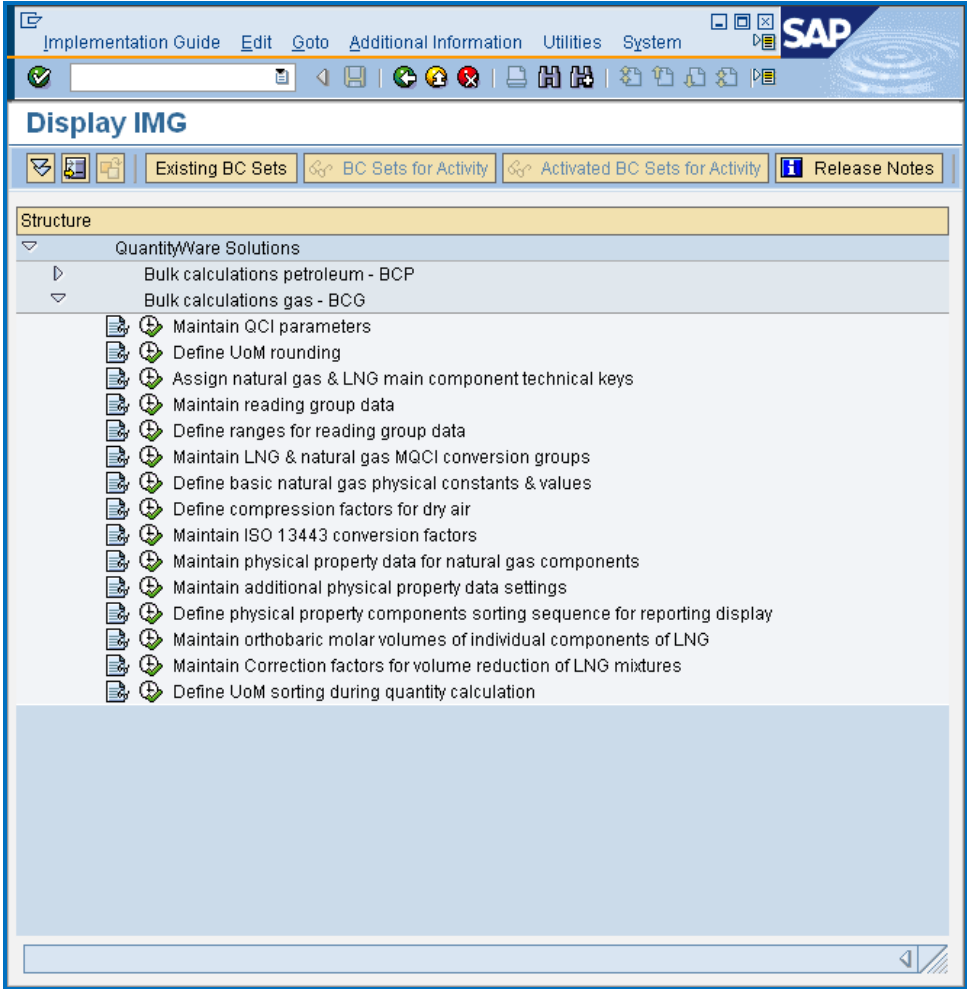

QuantityWare delivers customizing tables that are maintainable via transactions.

In order to easily access these customizing transactions, they are collected within the QuantityWare customizing IMG structure (Transaction SIMGH), which is accessible via the Gas Measurement Cockpit Menu path -> Goto – QuantityWare IMG

If you choose now display, you can e.g. expand the BCG node:

All activities are documented within the node documents. QuantityWare delivers example entries for all customizing tables with BC set /QTYW/BCG\_10A.
