

## 14.06.2009 - News Item: CSP12 Maintenance Update BCP10A

---

Support package 12 for BCP 10A on ERP 6.0 has been released. This package contains:

- The first QuantityWare BCP 10A Web Service definitions, supporting web service based quantity conversions for all BCP 10A products & conversion groups  
( [News Item: Web Service Enablement BCP10A.pdf](#) )
- A new MQCI Tolerance group check concept for optimized quantity data flow control through your supply chain
- Full MQCI implementation of API MPMS Chapter 11.5 (adjunct to ASTM D1250-08), including list printing via the Petroleum Measurement Cockpit  
( [News Item: MPMS Chapter 11.5.pdf](#) )
- Full MQCI implementation of ABNT NBR 5992-08, including list printing via the Petroleum Measurement Cockpit  
( [News Item: ABNT NBR 5992 08.pdf](#) )
- ASTM D1250-04 – Thermal expansion factor laboratory calculation via the Petroleum Measurement Cockpit
- Full MQCI support for bulk solid products (e.g. Sulphur)
- Implementation of ASTM D1250-80 tables 33, 34 and 52 for customer specific solutions
- New reading group default function for MQCI dialog box (classic SAP transaction support)

All standards are supported in the QuantityWare calculator
