

# Bulk Calculations – Solution BCS 3.0

## Release Notes Maintenance Level 03/04

Delivery content shipped with BCS 30B CSP03 / BCS 30A CSP04

## Notes

---

The latest version of this documentation can be found in the QuantityWare [Knowledge Base](#). All documentation is kept current for the combinations of latest BCS release with the latest supported SAP Oil & Gas release. For all currently supported combinations see [Note #000086 "Support and Release \(Lifecycle\) details"](#) page 2, "Release Lifecycle".

Your release level can be determined via:

`"/o/QTYW/COCKPIT" -> "Cockpit" -> "Support Package Level"` or

`"/o/QTYW/COCKPIT_GAS" -> "Cockpit" -> "Support Package Level"`

## Introduction

In 2006, QuantityWare GmbH was officially founded. Ten years after the initial release of BCP 1.0A (Bulk Calculations – Petroleum), **BCS 3.0 (Bulk Calculations – Solution)** was made available on 11.10.2016 to a constantly growing global customer base. Technically, the latest release of BCS (Bulk Calculation – Solution) is 30. The support for differing SAP Oil & Gas platforms is defined by the following letter:

**A** = ECC600

**B** = S/4HANA© 2025

E.g., the current BCS release supporting all current levels of SAP Oil & Gas on S/4HANA is **30B**. “Maintenance Levels” are delivered by QuantityWare via CSPs (Component Support Packages).

Previous BCS 30A/30B maintenance level release note locations:

- BCS 30A release notes for BCS 3.0 maintenance level (CSP) 00 [are published here.](#)
- BCS 30A release notes for BCS 3.0 maintenance level (CSP) 01 [are published here.](#)  
**(This is the BCS 30B CSP00 starting release level)**
- BCS 30A CSP02 / BCS 30B CSP01 release notes [are published here.](#)
- BCS 30A CSP03 / BCS 30B CSP02 release notes [are published here.](#)

Bulk Calculations - Solution (BCS) contains two products:

- Bulk Calculations - Petroleum (BCP)
- Bulk Calculations - Gas (BCG)

In terms of functionality, both **BCS 30B - Maintenance Level 03 (30B-03)** and **BCS 30A - Maintenance Level 04 (30A-04)** are identical. Due to this, 30B-03 is documented with the BCS 30A CSP04 (30A-04) documentation manual versions.

This document describes the functional and usability enhancements delivered with **30B-03** and **30A-04** for the two products listed above. The delivery date of this CSP is in **Q4 2025**.

## 1. QuantityCloud – ABAP Delivery

---

On October 14<sup>th</sup> 2024, QuantityWare announced the extension of our proven BCS solution to cloud applications – [QuantityCloud](#).

[QuantityCloud](#) provides access to the QuantityWare BCS quantity conversion functionality to systems external to SAP, initially via an SAP BTP iFlow (API).

With this CSP, the fundamental ABAP components of the initial QuantityCloud solution are delivered.

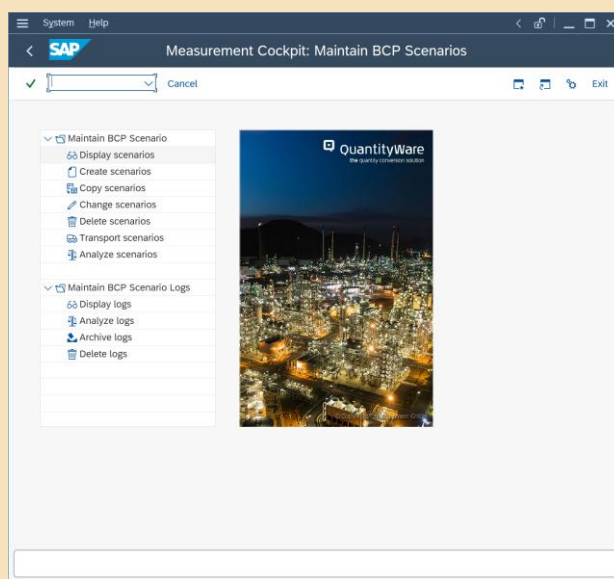

All additional details – licensing, technical set up, integration, and usage – are provided via separate dedicated QuantityCloud documentation.

## 2. PMC and GMC – User Interface

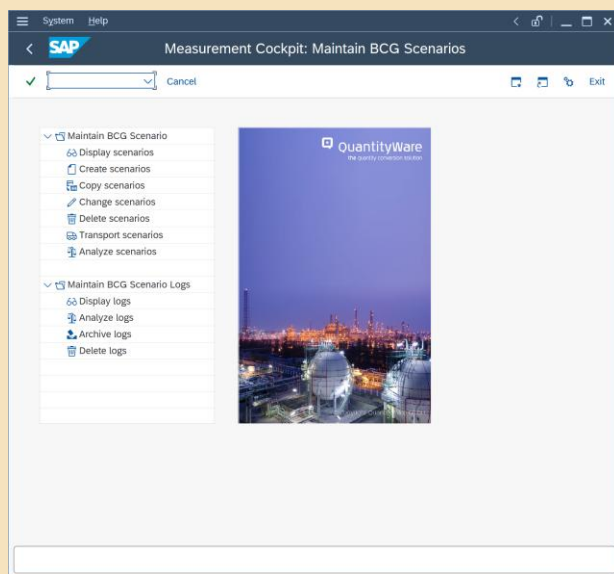

The test scenario maintenance and log access has been re-designed and usability has been greatly enhanced (see [AD note 000119](#) for details):

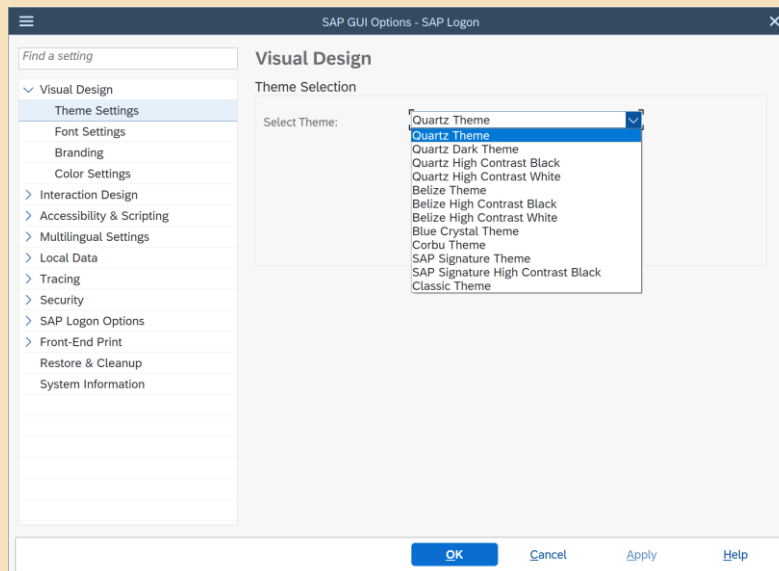

PMC:

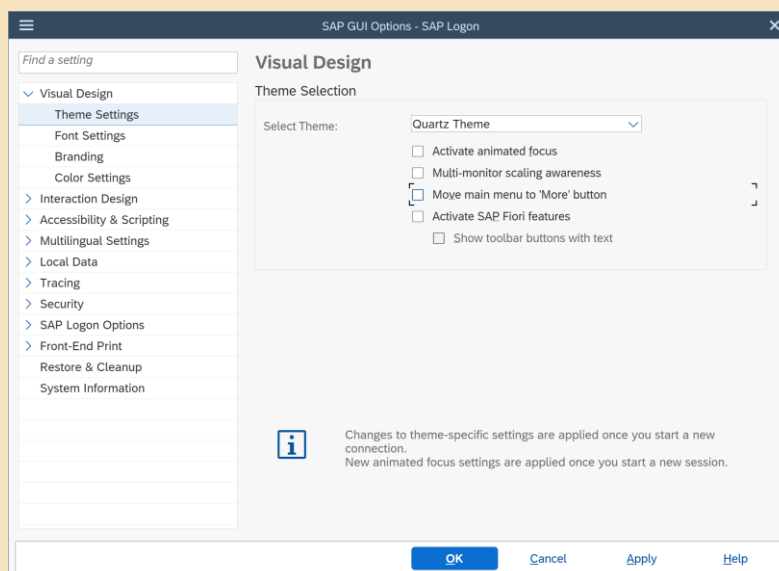

GMC:

No other major changes in the [PMC](#) and [GMC](#) UI have been made. All SAP GUI Themes are supported by the PMC and GMC – for the BCS documentation, QuantityWare is utilizing the **Quartz Theme**.

From a usability point of view, it is recommended to disable the “Move main menu to ‘More’ button” setting:

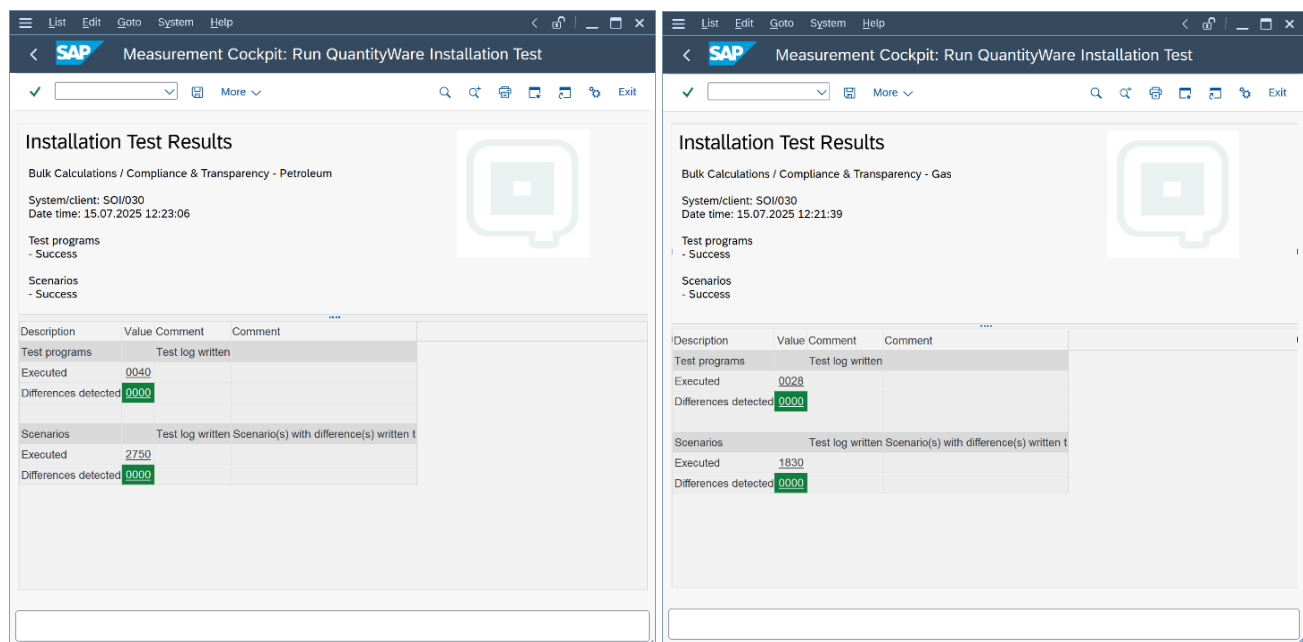

### 3. Template and Installation Test

With BCS 30B-03 and BCS 30A-04, the BCP and BCG templates have been enhanced with new measurement standards configurations (conversion groups, reading groups, range groups etc.).

**See chapter five for lists of new conversion, reading, and range groups.**

Based on our 19 years of experience, the enhancements also consider additional feedback from our network of certified consultants and their expertise during implementation projects.

The BCP Installation Test and the BCG Installation Test have both been extended considerably – for BCP, 2750 Test Scenarios are delivered, for BCG 1830 Test Scenarios are delivered:

Installation Test Results			
Bulk Calculations / Compliance & Transparency - Petroleum			
System/client: SOI/030			
Date time: 15.07.2025 12:23:06			
Test programs			
- Success			
Scenarios			
- Success			
Description	Value	Comment	Comment
Test programs Test log written			
Executed	0040		
Differences detected	0000		
Scenarios Test log written Scenario(s) with difference(s) written t			
Executed	2750		
Differences detected	0000		

  

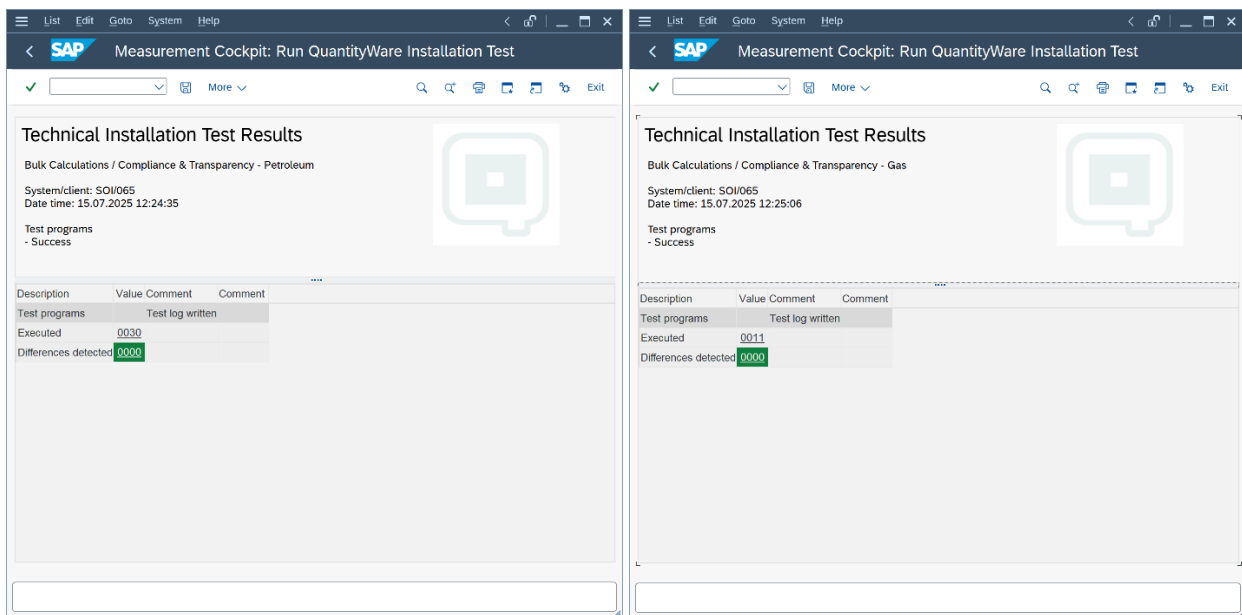

Installation Test Results			
Bulk Calculations / Compliance & Transparency - Gas			
System/client: SOI/030			
Date time: 15.07.2025 12:21:39			
Test programs			
- Success			
Scenarios			
- Success			
Description	Value	Comment	Comment
Test programs Test log written			
Executed	0028		
Differences detected	0000		
Scenarios Test log written Scenario(s) with difference(s) written t			
Executed	1830		
Differences detected	0000		

### 3.1. BCS Technical Installation Test - Enhancements

In 2023, a *Technical* Installation Test for BCP and BCG has been delivered. This test does not require the BCS template and may be executed in any system and client where BCP and/or BCG are/is installed. This test executes all purely ABAP based (configuration-independent) Installation Tests.

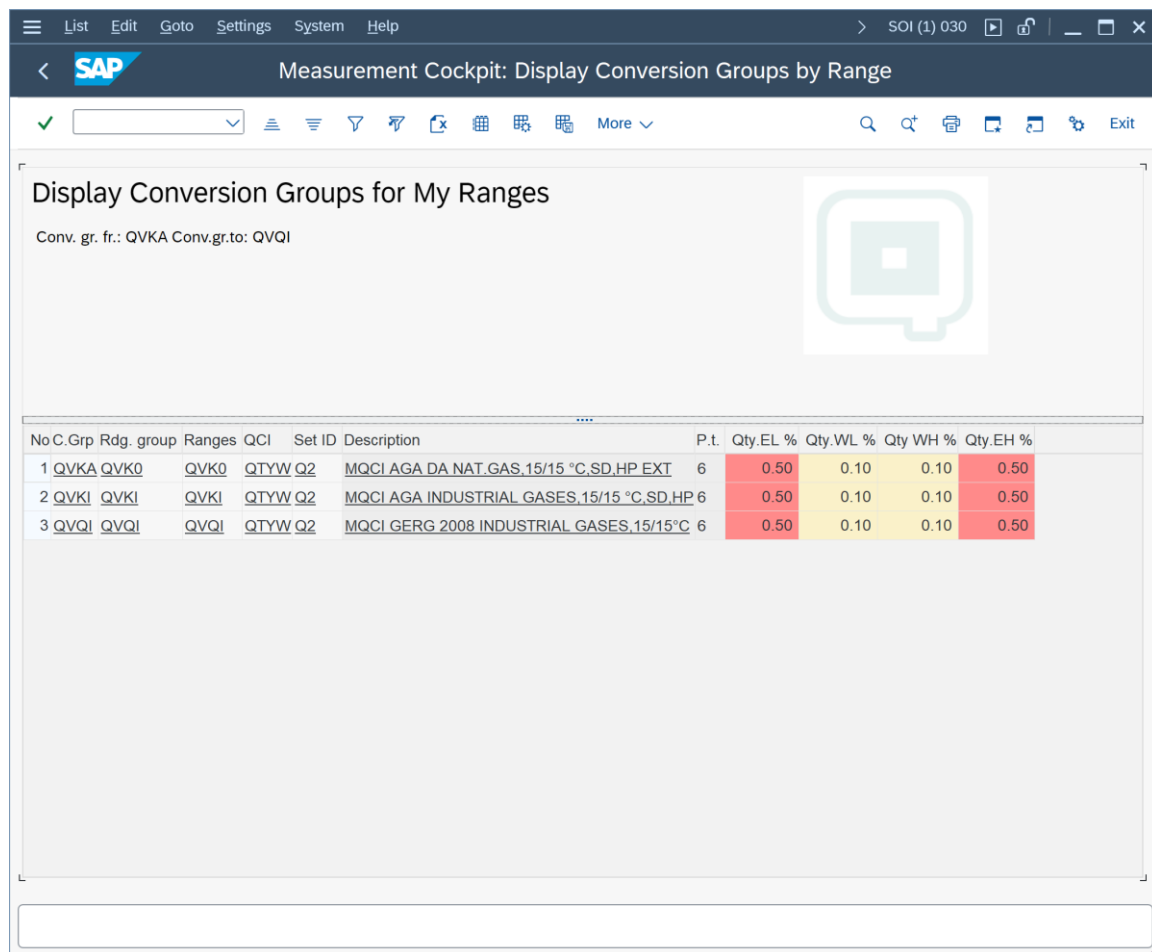

With this CSP, you may run the Technical Installation Test without a BCP or BCG usage key installed. The Technical Installation Test may be executed in any system and client, where BCS is installed.

In your [BCS client 045](#) – available in one dedicated system in your landscape, the configuration template is accessible after BC set activation and the complete Installation Test (including the *Technical* Installation Test) must be executed there.

## 4. Petroleum and Gas Measurement Standards

### 4.1. New Template Conversion Groups for Industrial Gases

With this CSP, three new template conversion groups are delivered for industrial gases:

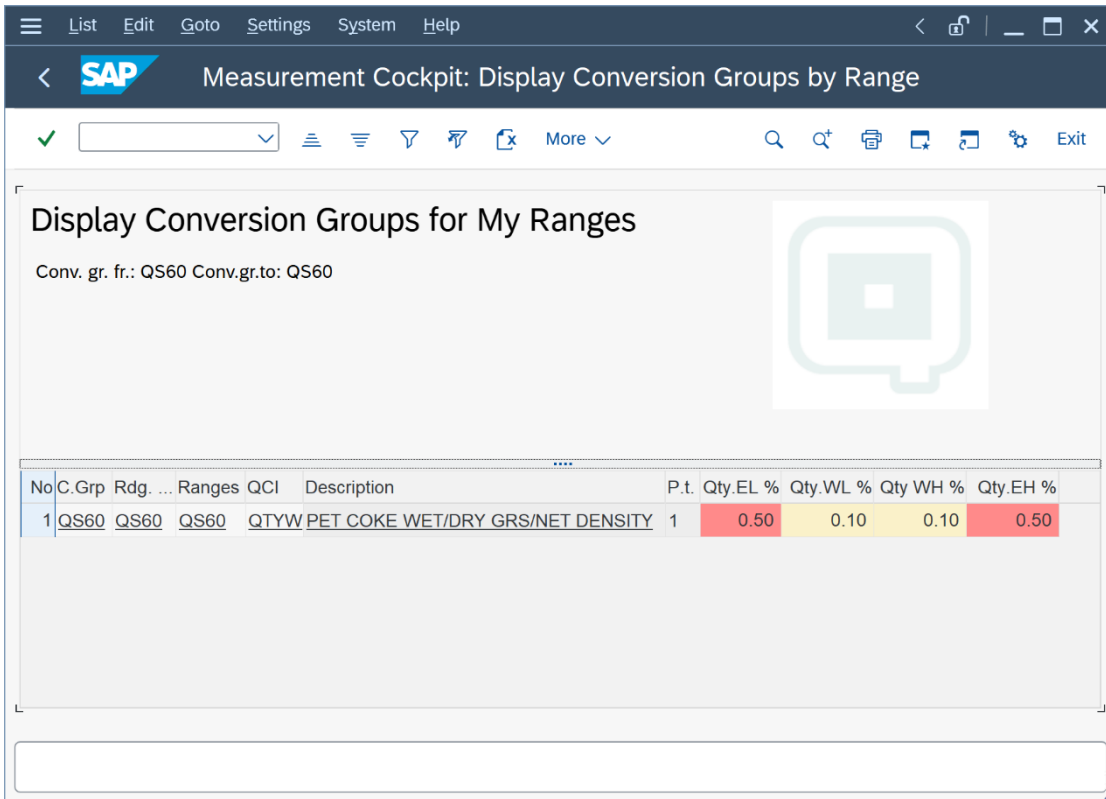

The screenshot shows the SAP Measurement Cockpit interface. The title bar indicates 'SOI (1) 030'. The main header is 'Measurement Cockpit: Display Conversion Groups by Range'. Below the header, there is a search bar and a 'More' dropdown. The main content area is titled 'Display Conversion Groups for My Ranges' and shows a table of conversion groups. The table has columns for 'No C.Grp', 'Rdg. group', 'Ranges', 'QCI', 'Set ID', 'Description', 'P.t.', 'Qty.EL %', 'Qty.WL %', 'Qty.WH %', and 'Qty.EH %'. There are three rows of data, each representing a different conversion group for industrial gases.

No C.Grp	Rdg. group	Ranges	QCI	Set ID	Description	P.t.	Qty.EL %	Qty.WL %	Qty.WH %	Qty.EH %
1	QVKA QVK0	QVK0	QTYW Q2	MQCI	AGA DA NAT.GAS,15/15 °C,SD,HP EXT	6	0.50	0.10	0.10	0.50
2	QVKI QVKI	QVKI	QTYW Q2	MQCI	AGA INDUSTRIAL GASES,15/15 °C,SD,HP 6	6	0.50	0.10	0.10	0.50
3	QVQI QVQI	QVQI	QTYW Q2	MQCI	GERG 2008 INDUSTRIAL GASES,15/15°C	6	0.50	0.10	0.10	0.50

## 4.2. New Template Conversion Group for Pet Coke

With this CSP, a new template conversion group is delivered for pet coke:

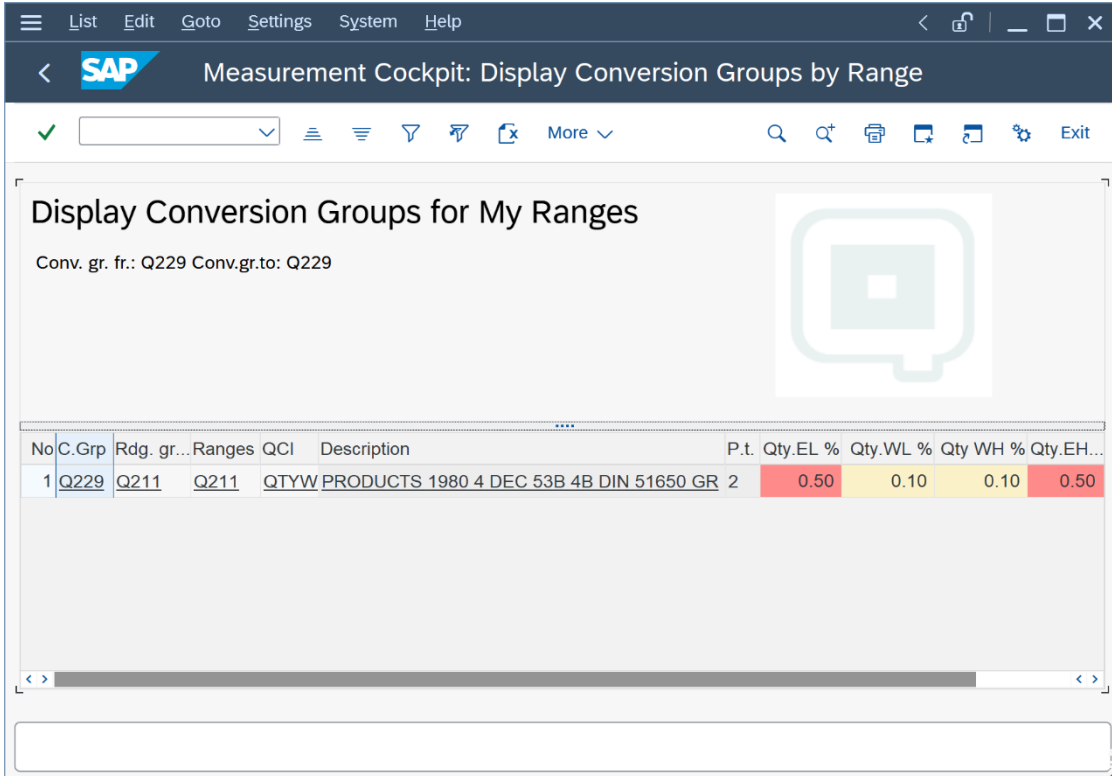

The screenshot shows the SAP Measurement Cockpit interface. The title bar reads "Measurement Cockpit: Display Conversion Groups by Range". Below the title bar, there is a search bar and a "More" dropdown menu. The main content area is titled "Display Conversion Groups for My Ranges" and shows a conversion group for "QS60" with a description "QTYW PET COKE WET/DRY GRS/NET DENSITY". A table below the title shows the conversion group details.

No	C.Grp	Rdg. ...	Ranges	QCI	Description	P.t.	Qty.EL %	Qty.WL %	Qty.WH %	Qty.EH %
1	QS60	QS60	QS60	QTYW	PET COKE WET/DRY GRS/NET DENSITY	1	0.50	0.10	0.10	0.50

See [Solid Products FAQ](#) for details.

### 4.3. New Template Conversion Group for DIN 51650 Model

With this CSP, a new template conversion group is delivered that implements DIN 51650 and DIN 51757 calculations for products, including a one-step model extension function:

The screenshot shows the SAP Measurement Cockpit interface. The title bar reads "Measurement Cockpit: Display Conversion Groups by Range". Below the title bar, there is a search bar and a "More" dropdown menu. The main content area is titled "Display Conversion Groups for My Ranges" and shows a table with the following data:

No	C.Grp	Rdg. gr...	Ranges	QCI	Description	P.t	Qty.EL %	Qty.WL %	Qty WH %	Qty.EH...
1	Q229	Q211	Q211	QTYW PRODUCTS 1980 4 DEC 53B 4B DIN 51650 GR	2	0.50	0.10	0.10	0.50	

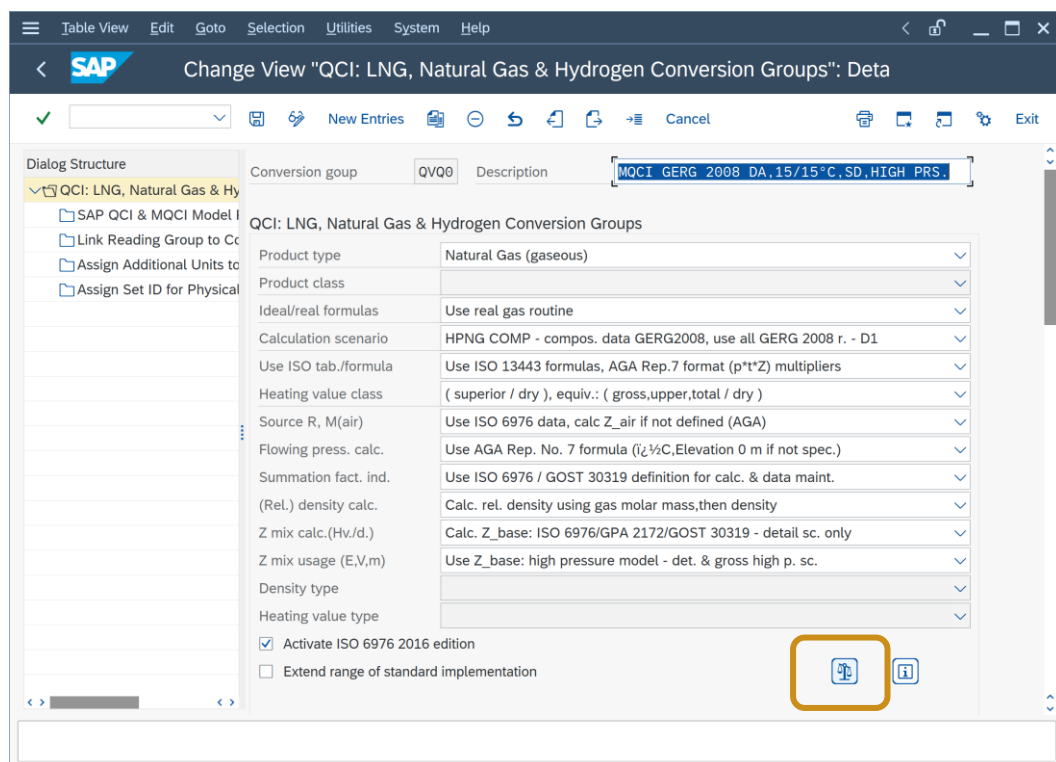

See [note 000122](#) for details.

## 5. Application and Usage Specific Features

The following chapters describe the application and usage specific enhancements.

### 5.1. BCP & BCG Functionality

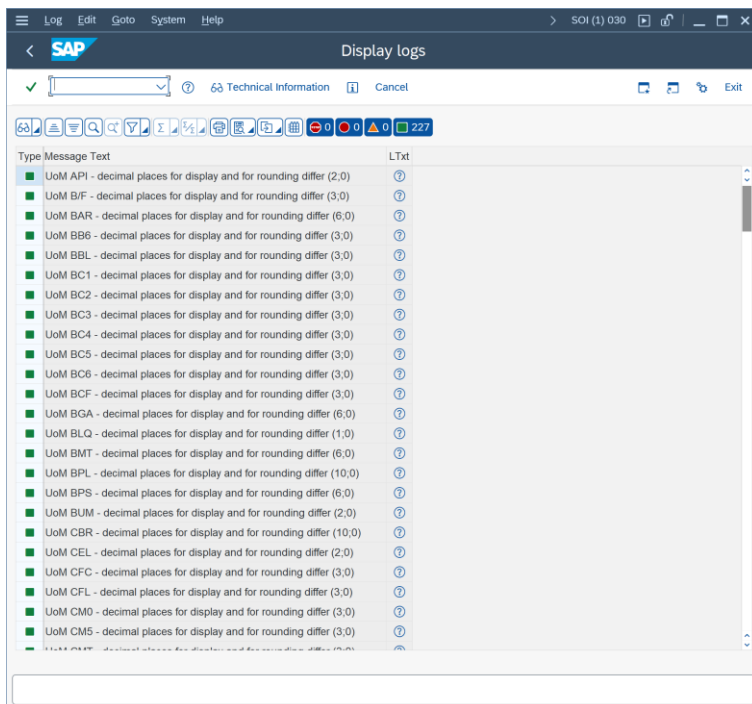

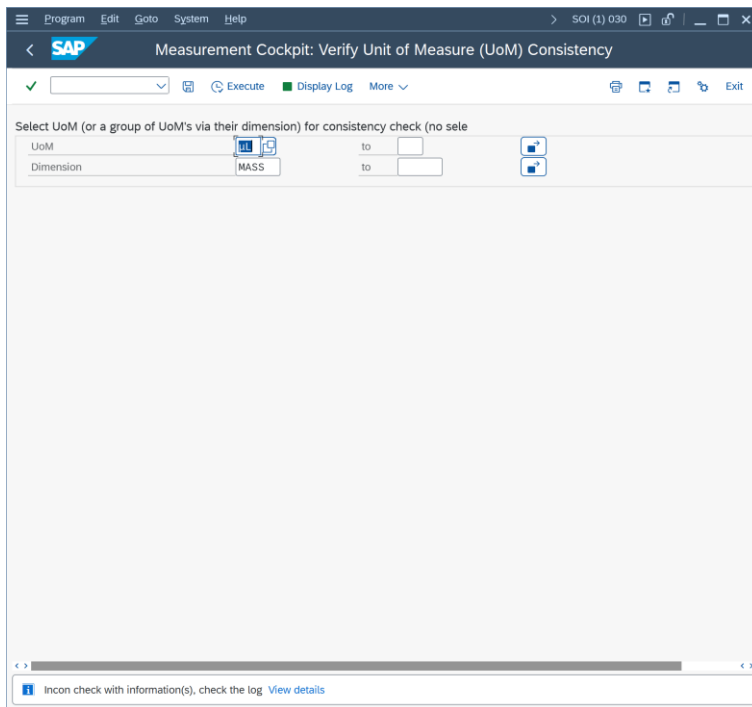

#### 5.1.1. New BCG & BCP Check Logic

New check logic has been implemented for the MQCI conversion group check. The existing check logic has been reviewed and message types have been adjusted, based on feedback from our network of [QWCC](#).

## 5.1.2. New UoM Technical Consistency Test

The existing UoM Technical Consistency Check has been completely renovated:

The check logic has been revised and is now documented with a long text for all issues found.

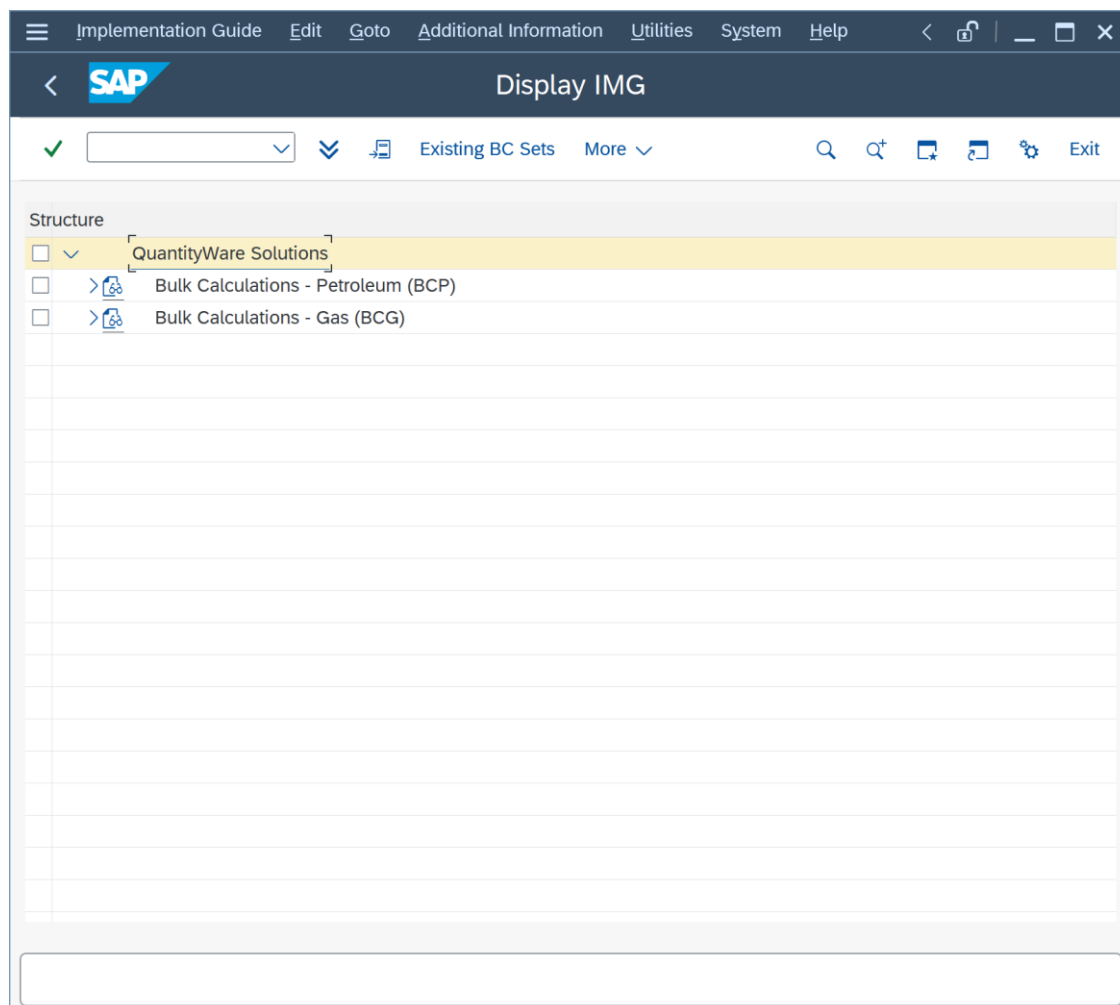

## 5.2. BCP & BCG Usability

### 5.2.1. BCG & BCP – IMG Restructuring

The QuantityWare IMG has been restructured, to clarify that CTP and CTG are sub-products contained in BCP and BCG.

- CTP stands for “**C**ompliance & **T**ransparency – **P**etroleum”. CTP is an integral part of [BCP](#), delivered with QuantityWare [BCS](#), programmed in SAP ABAP.
- CTG stands for “**C**ompliance & **T**ransparency – **G**as”. CTG is an integral part of [BCG](#), delivered with QuantityWare [BCS](#), programmed in SAP ABAP.

CTP and CTG provide BCS consultants and customers the ability to analyze, document and govern quantity conversion configurations and calculations (legacy SAP QCI configurations as well as state-of-the-art BCS configurations) from a central, structured transaction – the [Petroleum Measurement Cockpit](#) or the [Gas Measurement Cockpit](#).

## 7. BCS Documentation

---

With this BCS CSP, all BCS documentation manuals will be editorially revised and updated. All revised documents will be available in the QuantityWare knowledge base in December 2025.
