Compliance & Transparency – Petroleum (CTP)

Customer Information

QuantityWare

Compliance & Transparency – Petroleum (CTP)

CTP is a Bulk Calculations Solution (BCS) product. Fully integrated with the SAP Oil & Gas solution, CTP enables simple-

to-deliver transparency and GRC framework application to the bottom-line of your business – bulk goods quantity conversion management. CTP provides unique, centralized, management and control possibilities for all current quantity calculations being used within your SAP Oil & Gas solution. Fundamental CTP value factors are:

Transparency:

GRC:

CTP provides immediate clarity and precise definition. Via the OuantityWare Petroleum Measurement Cockpit (PMC), view and prove the definition of your business' fundamental values, satisfying customers, regulatory bodies and internal control instances. Your business is bulk materials movements, without full transparency and reliability, other GRC efforts are without foundation.

Support Governance efforts

assessment in the area of

product measurements is

only possible with complete

transparency and the ability

to access. document and

evaluate all factors.

by delivering specific

information to senior

Risk definition and

management.

Tel. + 49 7251 9823-003 Fax + 49 7251 9823-116 info@quantityware.com www.quantityware.com Compliance must be defined, managed and enforced – use the CTP framework to enable such activities in your business systems.

Due Diligence:

Business success, security and integrity are a primary organisational responsibility. Vast quantities of data are received from "the field" regarding material volumes, energy equivalents etc. With CTP, assess the accuracy of such data and provide your business with a "check and balance" – explain the numbers and ensure due diligence in your business activities.

Reduced Expenditure, Increased Flexibility:

Business times are turbulent; plan ahead by leveraging CTP to execute theoretical, non-productive calculations in any supported standard.

Proven Quality:

With over eleven years of productive usage on various SAP releases, CTP leverages proven QuantityWare technology currently in use by 70 customers in over 35 countries.

Solution Service and Support:

All customer issues are important, thus we offer a comprehensive maintenance and support service portal. Through certified consultants we offer our customer simplementation support and consulting security around the globe.

Holistic Solution:

The field of quantity calculations is as dynamic and complex as the demands of your business. A "single piece of software" cannot effectively address such complexity, thus we have integrated our software products into a holistic solution - BCS, consisting of: SAP ABAPbased software functionality, our Project Assessment and Implementation Guidelines (PAIG), expert maintenance, support and development, full documentation, plus training and working papers addressing current and frequently-queried topics.

Technical Quality:

Supporting all QCIcompatible calculations, as a part of the SAP-certified

BCS, CTP runs exclusively on the ABAP-stack. Using SAP-defined technical packages, technical handling is a familiar task for basis groups. QuantityWare BCS uses an SAP-defined object namerange and is nonmodifying. Extensive testing and technical procedures guarantee software quality. CTP customizing and configuration use standard SAP transport methods, ensuring adherence to existing quality and security policies. If necessary, CTP corrections are provided via CTS transports, allowing efficient issue resolution.
