PROFESSIONAL SUMMARY

I have 15 years of experience working with SAP O&G software in the management of silos and tanks. Throughout my career, I have gained extensive proficiency in utilizing SAP modules such as Transport Distribution (TD), QuantityWare (QW) and TAS (Terminal Automation System Interface) to streamline operations and ensure efficient management of inventory and maintenance processes within the silo/tank environment.

In my role as a SAP O&G expert, I have consistently demonstrated strong problem-solving skills. For example, when faced with issues related to stock reconciliation process, or quantity conversion differences, I proactively utilized SAP Oil best practices and my current experience to identify and solve this pain points.

SKILLS

- SAP OIL Hydrocarbon Management
- Software Quality Assurance
- SAP OIL Transport and Distribution
- S/4 HANA
- Sap Oil&Gas -MAP- TSW- TAS
- Plan Agile Sprints
- Interface Design and Implementation
- Debugging and Troubleshooting
