

Note: 000008

Overview

Number	000008
Description	Measurement Standards – Organizations & Sources
Version	04 from 05.04.2024
Status	Released to Customer
Language	EN
Responsible	John Mantle & Markus Seng
Product	BCS
Category	Consulting & Configuration

Symptom

You have purchased a usage key for one or two of the two BCS products; BCP and/or BCG. You need to cross check a calculation result with a printed version of a referenced measurement standard.

Cause

Quality processes.

Solution

QuantityWare develops implementations of petroleum and natural gas measurement standards. QuantityWare purchases the relevant standards from the standard organizations which publish these standards (either as printed documents or in PDF format).

QuantityWare respects the Copyright of all standard institutes and does not distribute any of these documents, neither in printed nor electronic form. We strongly recommend that a customer purchases their own licensed copies of the relevant standard documents to cross check our implementations.

If you are not sure how and where to purchase a certain standard, visit <https://www.iso.org/home.html> and find the national standards organization that represents your country at ISO. There, you can usually find information as to how to obtain a certain standard in your native language. We have sourced various standards from the following organisations:

<https://store.accuristech.com/>

<http://www.api.org/products-and-services/standards/purchase/>

<https://www.iso.org/store.html>

<http://www.astm.org/>
