

Note: 000051

Overview

Number	000051
Description	Productive Systems Information
Version	04 from 19.06.2020
Status	Released to Customer
Language	EN
Responsible	John Mantle
Product	BCS
Category	Technical Installation

Symptom

You are considering, or are already using, QuantityWare software in a productive environment.

Cause

Not Applicable

Solution

TRAINED PEOPLE:

QuantityWare recommends that BCS (Bulk Calculations Solution) products (BCP, BCG, CTP, CTG) only be implemented by trained, certified people. A list of consulting organisations or free-lance consultants is available under the "Support" section of the [QuantityWare website](#).

TEST SCENARIOS:

QuantityWare recommends that the quantity conversion customising be regularly controlled in your productive client via the (Petroleum / Gas) Measurement Cockpit (PMC / GMC) (transaction "/o/qtyw/cockpit" or "/o/qtyw/cockpit_gas"). The most effective manner in which such controls can be performed is via QuantityWare "Test Scenario" usage.

USAGE KEY EXPIRY:

To identify the type of usage key which has been installed in your system, refer to the PMC / GMC, menu point "Cockpit" -> "License". For time-restricted usage keys, warnings are displayed when accessing the PMC / GMC at the following intervals:

- 182 days before usage key expiry (can be "cancelled" and will not be displayed again)
- 090 days before usage key expiry (can be "cancelled" and will not be displayed again)
- 015 days before usage key expiry (cannot be cancelled – is displayed every day when entering the cockpit)

Transport Reference

No SAP-based transport
