Note: 000056

Overview

Number	**000056**
Description	**Authorization Roles Delivery**
Version	**03 from 07.09.2021**
Status	**Released to Customer**
Language	**EN**
Responsible	**John Mantle**
Product	**BCS**
Category	**Technical Installation**

Symptom

Customer with maintenance level BCS 10B - CSP03 and above, need to exclusively distribute QuantityWare user authorizations.

Cause

SAP Certified Integrations MUST deliver customising via BC-Sets when based upon ECC600 or S/4HANA. A partial activation of BC-Set contents is possible, but extremely time-consuming and error-prone. Owing to existing customising in a client, the complete QuantityWare BC-Set containing the necessary authorizations cannot be activated.

Solution

As described in the BCS Technical Installation Manual, the QuantityWare reference client ("045") must be created as a single client in the customer system landscape; as the related BC-Set contains the appropriate authorizations, the authorization settings must be copied from this client by means of a standard SAP CTS transport for distribution to other clients and systems. To simplify this task, the object list "/QTYW/ROLES" has been delivered with BCS 10B CSP03 (and above) providing the customer with all relevant CTS entries which can be easily included in a customer transport.

For further details of the new authorizations, please refer to Chapter 10 of the "Documentation Reference Manual" for BCS 3.0, available in the QuantityWare Knowledge Base: QuantityWare website

Additional Actions 30A CSP002 and 30B CSP001

In these CSPs, changes have been made in the Roles delivered (both Single and Composite). You should re-distribute the QuantityWare roles to all applicable clients - to help you with this, the object list "QTYW/ROLES" has been updated and is delivered in these CSPs.

Please note that the Composite Role Y_QTYW_CR_ALL has been removed from the delivery. Please ensure that this role is also removed in all applicable systems / clients. As an alternative to this role, the Y_QTYW_CERTIFIED_CONSULTANT can be used.

Transport Reference

No SAP-based transport

Validity

SAP Release	From SP	To SP	In SP Shipment
ECC600	10B CSP03	-	BCS 3.0
S/4 HANA	ALL	ALL	BCS 3.0
