

Note: 000062

Overview

Number	000062
Description	SAP PRA: Message /QTYW/QCI 019 Raised Erroneously
Version	2 from 11.07.2017
Status	Released to Customer
Language	EN
Responsible	Markus Seng
Product	BCP
Category	Correction - SAP Integration

Symptom

You are running an ASTM D1250-04 conversion group for crude oil within your SAP PRA measurement system. During a calculation, message /QTYW/QCI 019 – “The field COMPF_ALT_U / COMPF_OBS_U is not available in the parameter table OIB07” is raised and the calculation stops.

Cause

Within the SAP PRA measurement system, a check logic analyses the SY-MSG* fields (although SY-SUBRC is returned with 0 value from the SAP QCI) and issues the message described above if non-initial values are found (message number and message class).

Solution

Integration code enhancement to function /QTYW/MV_IF2004_FROM_ITAB - such that all SY-MSG* fields are cleared before results are passed to the SAP PRA measurement system, where SY-SUBRC is zero.
