Note: 000069

Overview

Number	**000069**
Description	**C to ABAP Migration Tool – Enhancements & Corrections**
Version	**2 from 13.07.2017**
Status	**Released to Customer**
Language	**EN**
Responsible	**Markus Seng**
Product	**BCP**
Category	**Correction - PMC & GMC**

Symptom

You migrate your SAP ECC conversion groups that are configured to run with the API Flow-Cal c-code implementation or the legacy API 1980 c-code implementation to the corresponding QuantityWare BCS conversion groups using the "C to ABAP" conversion tool provided with the Petroleum Measurement Cockpit (PMC). You try to save a transport request after you have confirmed an automated change and receive error message no. TK295 .

Cause

- Programming error. Language key not passed to transport builder for Table OIB01T.

- Detailed analysis showed that the conversion tool also requires update of the mapping logic to ensure that CTP customers may migrate their already renovated legacy conversion groups.

- Mass tests, as described in note 000068 (published in December 2016), showed that additional mapping options are required in C to ABAP tool for ASTM D1250-2004 mapping.

Solution

Corrections and enhancements for the three items described in section "Cause" are delivered with the transport of this note. Online documentation of C to ABAP tool has been updated to reflect all enhancements.

Transport Reference

SAP Release	Transport	File Name	Notes
ECC600	QOIK900278	NOTE-00069-600.SAR	
S/4 HANA	QOIK900278	NOTE-00069-600.SAR	

Validity

SAP Release	From SP	To SP	In SP Shipment
ECC600	BCS 3.0	BCS 3.0 CSP01	BCS 3.0 CSP01
S/4 HANA	0	0	BCS 3.0
