

Note: 000104

Overview

Number	000104
Description	PMC - Conversion group model check - incorrect error log
Version	1 from 29.10.2021
Status	Released to Customer
Language	EN
Responsible	Markus Seng
Product	BCP
Category	Correction - PMC & GMC

Symptom

After installation of BCS 3.0A CSP02 / BCS 3.0B CSP01, you execute the conversion group check (e.g. via the PMC -> QCI Configuration -> Explain, Check & Transport -> Check conversion group) and receive a number of error messages concerning the US_BASE_* conversion group model settings. These error messages make no sense.

Cause

Program error in new consistency check logic for model UoM. Read with central function module of dimension ID for all possible models may lead to empty results for all ID if one ID is not defined in client, since it is not required in that client. Subsequently, incorrect error log entries are written.

Solution

Program correction. Single read of all potentially required ID.

Transport Reference

SAP Release	Transport	File Name	Notes
ECC600	QOIK900362	NOTE-00104-30x.SAR	
S/4 HANA	QOIK900362	NOTE-00104-30x.SAR	

Validity

SAP Release	From SP	To SP	In SP Shipment
ECC600	BCS 3.0 CSP02	BCS 3.0 CSP03	BCS 3.0 CSP03
S/4 HANA	BCS 3.0 CSP01	BCS 3.0 CSP02	BCS 3.0 CSP02
