| Category | Technical Installation |

Symptom

An exception has occurred in class "CX_SY_CONVERSION_NO_NUMBER". This exception was not caught in procedure "FILL_FROM_BCSET" "(FORM)" or propagated by a RAISING clause.

Since the caller of the procedure could not have anticipated this exception, the current program was terminated.

The reason for the exception are inconsistent data in the BC-Set, where an attempt was made to interpret value "2.589.988" as a number.

As this value contravenes the rules for displaying numbers correctly, this was not possible.

Cause

The Business Configuration (BC) Set delivered in the support package 30A/CSP_003 and 30B/CSP_002 contains corrupted data.

Solution

Apply this note which contains new BC-Sets.
