

# International SAP Conference for Energy 2023

## Innovative – Resilient – Sustainable: The Energy Industry of the Future

Find out more on our website: [International SAP Conference for Energy 2023](#).

The 2022 program featured customer case studies from: **Aker BP, BASF, Bharat Petroleum, Chevron, Crescent Petroleum, GALP, Motor Oil, Petrobras, Saudi Aramco, Sempra, and Shell**. Check out the [2022 Brochure](#).

### In-Person or On-Demand Basel, Switzerland | 18 – 20 April, 2023

The energy industry is transforming to balance energy security with sustainability and affordability, driven by stakeholder demands for low-to-no carbon systems and improved ESG performance. Moreover, the energy product portfolio is diversifying with LNG, hydrogen, alternate fuels, renewables, CO2 capture services and more. The 2023 **International SAP Conference for Energy** will equally mark these recent changes.

- ✓ **A two-day diverse, interactive and exclusive agenda** (April 19-20) filled with some of the biggest names in the industry, featuring best practices, lessons learned, and benchmarks
- ✓ **A new and improved pre-conference day** (April 18) with modular interactive sessions, deep dives, expert clinics, demos, and much more!
- ✓ **An offsite evening event** (April 19) at [Altes Kraftwerk, Basel](#)
- ✓ A dedicated **Business Women's Networking Lunch** (April 20)
- ✓ **Interact with peers** in meetings, interactive sessions, microforums, Q&As
- ✓ **Gain access** to virtual content, demos, webinars, and post-event on-demand content
- ✓ The 2023 event is co-located with the [International SAP Conference for Utilities](#). Explore industry synergies with shared keynotes, joint tracks, and a combined exhibition with extensive networking opportunities.
